**Memory, History, Forgetting**-Paul Ricoeur 2009-01-01 Why do major historical events such as the Holocaust occupy the forefront of the collective consciousness, while profound moments such as the Armenian genocide, the McCarthy era, and France's role in North Africa stand distantly behind? Is it possible that history "overly remembers" some events at the expense of others? A landmark work in philosophy, Paul Ricoeur's *Memory, History, Forgetting* examines this reciprocal relationship between

remembering and forgetting, showing how it affects both the perception of historical experience and the production of historical narrative. *Memory, History, Forgetting*, like its title, is divided into three major sections. Ricoeur first takes a phenomenological approach to memory and mnemonical devices. The underlying question here is how a memory of present can be of something absent, the past. The second section addresses recent work by historians by reopening the question of the nature and truth of historical knowledge. Ricoeur explores whether historians, who can write a history of memory, can truly break with all dependence on memory, including memories that resist representation. The third and final section is a profound meditation on the necessity of forgetting as a condition for the possibility of remembering, and whether there can be something like happy forgetting in parallel to happy memory. Throughout the book there are careful and close readings of the texts of Aristotle and Plato, of Descartes and Kant, and of Halbwachs and Pierre Nora. A momentous achievement in the career of

one of the most significant philosophers of our age, *Memory, History, Forgetting* provides the crucial link between Ricoeur's *Time and Narrative* and *Oneself as Another* and his recent reflections on ethics and the problems of responsibility and representation. "His success in revealing the internal relations between recalling and forgetting, and how this dynamic becomes problematic in light of events once present but now past, will inspire academic dialogue and response but also holds great appeal to educated general readers in search of both method for and insight from considering the ethical ramifications of modern events. . . . It is indeed a master work, not only in Ricoeur's own vita but also in contemporary European philosophy."—*Library Journal* "Ricoeur writes the best kind of philosophy—critical, economical, and clear."—*New York Times Book Review*

**A Different Mirror**-Ronald Takaki 2012-06-05  
Takaki traces the economic and political history of Indians, African Americans, Mexicans,

Japanese, Chinese, Irish, and Jewish people in America, with considerable attention given to instances and consequences of racism. The narrative is laced with short quotations, cameos of personal experiences, and excerpts from folk music and literature. Well-known occurrences, such as the Triangle Shirtwaist Factory Fire, the Trail of Tears, the Harlem Renaissance, and the Japanese internment are included. Students may be surprised by some of the revelations, but will recognize a constant thread of rampant racism. The author concludes with a summary of today's changing economic climate and offers Rodney King's challenge to all of us to try to get along. Readers will find this overview to be an accessible, cogent jumping-off place for American history and political science plus a guide to the myriad other sources identified in the notes.

**Harriet Tubman**-Milton C. Sernett 2007-10-15  
Harriet Tubman is one of America's most beloved historical figures, revered alongside luminaries

including Abraham Lincoln and Frederick Douglass. Harriet Tubman: Myth, Memory, and History tells the fascinating story of Tubman's life as an American icon. The distinguished historian Milton C. Sernett compares the larger-than-life symbolic Tubman with the actual "historical" Tubman. He does so not to diminish Tubman's achievements but rather to explore the interplay of history and myth in our national consciousness. Analyzing how the Tubman icon has changed over time, Sernett shows that the various constructions of the "Black Moses" reveal as much about their creators as they do about Tubman herself. Three biographies of Harriet Tubman were published within months of each other in 2003-04; they were the first book-length studies of the "Queen of the Underground Railroad" to appear in almost sixty years. Sernett examines the accuracy and reception of these three books as well as two earlier biographies first published in 1869 and 1943. He finds that the three recent studies come closer to capturing the "real" Tubman than did the earlier two. Arguing that the mythical Tubman is most clearly

enshrined in stories told to and written for children, Sernett scrutinizes visual and textual representations of "Aunt Harriet" in children's literature. He looks at how Tubman has been portrayed in film, painting, music, and theater; in her Maryland birthplace; in Auburn, New York, where she lived out her final years; and in the naming of schools, streets, and other public venues. He also investigates how the legendary Tubman was embraced and represented by different groups during her lifetime and at her death in 1913. Ultimately, Sernett contends that Harriet Tubman may be America's most malleable and resilient icon.

**In Praise of Forgetting**-David Rieff 2016-01-01  
A leading contrarian thinker explores the ethical paradox at the heart of history's wounds The conventional wisdom about historical memory is summed up in George Santayana's celebrated phrase, "Those who cannot remember the past are condemned to repeat it." Today, the consensus that it is moral to remember, immoral

to forget, is nearly absolute. And yet is this right? David Rieff, an independent writer who has reported on bloody conflicts in Africa, the Balkans, and Central Asia, insists that things are not so simple. He poses hard questions about whether remembrance ever truly has, or indeed ever could, "inoculate" the present against repeating the crimes of the past. He argues that rubbing raw historical wounds--whether self-inflicted or imposed by outside forces--neither remedies injustice nor confers reconciliation. If he is right, then historical memory is not a moral imperative but rather a moral option--sometimes called for, sometimes not. Collective remembrance can be toxic. Sometimes, Rieff concludes, it may be more moral to forget. Ranging widely across some of the defining conflicts of modern times--the Irish Troubles and the Easter Uprising of 1916, the white settlement of Australia, the American Civil War, the Balkan wars, the Holocaust, and 9/11--Rieff presents a pellucid examination of the uses and abuses of historical memory. His contentious, brilliant, and elegant essay is an indispensable work of moral

philosophy.

**Dresden**-Elizabeth A. Ten Dyke 2014-05-22 The collapse of the German Democratic Republic prompted the East Germans to confront their personal, cultural and international past. This study of the 'Wende' - the turn of events in 1989 - is based on ethnographic and anthropological research conducted in the early 1990s. Liz Ten Dyke has developed a finely nuanced portrait of the city and its residents as they were caught up in the economic, political and social turmoil that characterized the immediate post-socialist period. By weaving together scholarly research, oral history, and "ethnographic excursions" or narratives of salient experiences, this book makes an important contribution to the study of

social aspects of the past. Moving beyond paradigms presently shaping the study of memory, it details the paradoxes and contradictions inherent in remembering, making manifest the link between such contradictions and larger symbolic and political-economic contexts. In this way, the author situates the study of memory in history and shows that it is the mutability of memory, in conjunction with the uncertainty of history, that render the past a dynamic and powerful force in human society.

**The Sixties**-David Farber 2012-12-01 This collection of original essays represents some of the most exciting ways in which historians are beginning to paint the 1960s onto the larger canvas of American history. While the first literature about this turbulent period was written largely by participants, many of the contributors to this volume are young scholars who came of age intellectually in the 1970s and 1980s and thus write from fresh perspectives. The essayists ask fundamental questions about how much

America really changed in the 1960s and why certain changes took place. In separate chapters, they explore how the great issues of the decade--the war in Vietnam, race relations, youth culture, the status of women, the public role of private enterprise--were shaped by evolutions in the nature of cultural authority and political legitimacy. They argue that the whirlwind of events and problems we call the Sixties can only be understood in the context of the larger history of post-World War II America. **First City**-Gary B. Nash 2013-08-20 With its rich foundation stories, Philadelphia may be the most important city in America's collective memory. By the middle of the eighteenth century William Penn's "greene countrie town" was, after London, the largest city in the British Empire. The two most important documents in the history of the United States, the Declaration of Independence and the Constitution, were drafted and signed in Philadelphia. The city served off and on as the official capital of the young country until 1800, and was also the site of the first American university, hospital, medical college, bank, paper mill, zoo, sugar refinery, public school, and government mint. In *First City*, acclaimed historian Gary B. Nash examines the complex process of memory making in this most historic

of American cities. Though history is necessarily written from the evidence we have of the past, as Nash shows, rarely is that evidence preserved without intent, nor is it equally representative. Full of surprising anecdotes, *First City* reveals how Philadelphians—from members of elite cultural institutions, such as historical societies and museums, to relatively anonymous groups, such as women, racial and religious minorities, and laboring people—have participated in the very partisan activity of transmitting historical memory from one generation to the next.

**The Role of Agency and Memory in Historical Understanding**-Gordon P. Andrews 2017-05-11 This book, the first in a series entitled Historical and Pedagogical Issues: Insights from the Great Lakes History Conference, addresses historical and pedagogical issues. It explores the agency of historical actors tied to larger movements, demonstrating the efficacy and power of individuals to act with historical impact. It also describes the nuanced role of memory, often neglected in larger national or global social movements. This volume explores these powerful themes through a broad range of topics, including the research and

pedagogy of revolution, reform, and rebellion as they are applied to race, ethnicity, political movements, labour, reconciliation, memory, and moral responsibility. The book will interest researchers that have an interest in both, or either, history and pedagogy.

**Memory in Early Modern Europe, 1500-1800**-Judith Pollmann 2017-08-17 In *Memory in Early Modern Europe* Judith Pollmann offers an introduction to the way in which Europeans on the Continent and in the British Isles practised memory in the three centuries between 1500 and 1800. In early modern Europe the past served as a main frame of moral, political, legal, religious, and social reference for people of all walks of life. Because it mattered so much, it was also hotly contested, and subject to constant reinvention. Building both on existing studies and new primary research, the first aim of this book is to account for the omnipresence, importance, and changing uses of the past among early modern Europeans. Its second aim is to

situate early modern memory more clearly in the memory studies field, and to show how relevant a better knowledge of early modern memory is to students and scholars who study the role memory practices in modern societies. Many scholars have argued that the Age of Revolutions at the end of the eighteenth century completely transformed the way in which Europeans experienced the past and came to think about the future. Memory in Early Modern Europe demonstrates that while some memory practices had indeed profoundly changed by 1800, the emergence of new ways of engaging with the past was a more gradual process and did not put an end to traditional ways of thinking about it; rather, old and new ways came to exist side by side, and, to a surprising extent, continue to do so to our own day.

**Memory**-Susannah Radstone 2010 These essays survey the histories, the theories and the fault lines that compose the field of memory research. Drawing on the advances in the sciences and in

the humanities, they address the question of how memory works, highlighting transactions between the interiority of subjective memory and the larger fields of public or collective memory.

**Stories of Our Lives**-Frank de Caro 2013-07-15

In *Stories of Our Lives* Frank de Caro demonstrates the value of personal narratives in enlightening our lives and our world. We all live with legends, family sagas, and anecdotes that shape our selves and give meaning to our recollections. Featuring an array of colorful stories from de Caro's personal life and years of field research as a folklorist, the book is part memoir and part exploration of how the stories we tell, listen to, and learn play an integral role in shaping our sense of self. De Caro's narrative includes stories within the story: among them a near-mythic capture of his golden-haired grandmother by Plains Indians, a quintessential Italian rags-to-riches grandfather, and his own experiences growing up in culturally rich 1950s New York City, living in India amid the fading glories of a former princely state, conducting field research on Day of the Dead altars in Mexico, and coming home to a battered New Orleans after Hurricane Katrina. *Stories of Our*

*Lives* shows that our lives are interesting, and that the stories we tell—however particular to our own circumstances or trivial they may seem to others—reveal something about ourselves, our societies, our cultures, and our larger human existence.

**History, Memory, and the Law**-Austin Sarat 2009-11-10 Law in the modern era is one of the most important of our society's technologies for preserving memory. In helping to construct our memory in certain ways law participates in the writing of our collective history. It plays a crucial role in knitting together our past, present, and future. The essays in this volume present grounded examinations of particular problems, places, and practices and address the ways in which memory works in and through law, the sites of remembrance that law provides, the battles against forgetting that are fought in and around those sites, and the resultant role law plays in constructing history. The writers also inquire about the way history is mobilized in

legal decision making, the rhetorical techniques for marshalling and for overcoming precedent, and the different histories that are written in and through the legal process. The contributors are Joan Dayan, Soshana Felman, Dominic La Capra, Reva Siegel, Brook Thomas, and G.

**Sexuality and German Fascism**-Dagmar Herzog 2005 The interrelationship of fascism and sexuality has attracted a great deal of interest for some time now. This collection offers fresh perspectives by leading scholars on the history of sexuality under national socialism on such topics as the persecution of Jewish-gentile sex in the "race defilement" trials, homophobic propaganda and the prosecution of same-sex activity within the Wehrmacht and SS, representations of female sexuality in film, prostitution on home and battle fronts, sexual relations between Germans and foreign forced laborers, and reproductive practices among Jewish survivors. Moreover, the authors provide new insights into the relationships between Nazi sexual politics and antisemitism and challenge assumptions of Nazism as sexually repressive; instead they emphasize the interrelationships between

incitement to sexual activity and persecution and mass murder.

### **History and Memory after Auschwitz-**

Dominick LaCapra 2018-09-05 The relations between memory and history have recently become a subject of contention, and the implications of that debate are particularly troubling for aesthetic, ethical, and political issues. Dominick LaCapra focuses on the interactions among history, memory, and ethico-political concerns as they emerge in the aftermath of the Shoah. Particularly notable are his analyses of Albert Camus's novella *The Fall*, Claude Lanzmann's film *Shoah*, and Art Spiegelman's "comic book" *Maus*. LaCapra also considers the Historians' Debate in the aftermath of German reunification and the role of psychoanalysis in historical understanding and

critical theory. In six essays, LaCapra addresses a series of related questions. Are there experiences whose traumatic nature blocks understanding and disrupts memory while producing belated effects that have an impact on attempts to address the past? Do some events present moral and representational issues even for groups or individuals not directly involved in them? Do those more directly involved have special responsibilities to the past and the way it is remembered in the present? Can or should historiography define itself in a purely scholarly and professional way that distances it from public memory and its ethical implications? Does art itself have a special responsibility with respect to traumatic events that remain invested with value and emotion?

**Trace**-Lauret E. Savoy 2015 Sand and stone are Earth's fragmented memory. Each of us, too, is a landscape inscribed by memory and loss. One life-defining lesson Lauret Savoy learned as a young girl was this: the American land did not hate. As an educator and Earth historian, she has tracked the continent's past from the relics of deep time; but the paths of ancestors toward herpaths of free and enslaved Africans, colonists from Europe, and peoples indigenous to this landlie largely eroded and lost. In this provocative and powerful mosaic of personal journeys and historical inquiry across a continent and time, Savoy explores how the country's still unfolding history, and ideas of race," have marked her and the land. From twisted terrain within the San Andreas Fault zone to a South Carolina plantation, from national parks to burial grounds, from Indian Territory" and the U.S.- Mexico Border to the U.S. capital,Trace grapples with a searing national history to reveal the often

unvoiced presence of the past. In distinctive and illuminating prose that is attentive to the rhythms of language and landscapes, she weaves together human stories of migration, silence, and displacement, as epic as the continent they survey, with uplifted mountains, braided streams, and eroded canyons. Gifted with this manifold vision, and graced by a scientific and lyrical diligence, she delves through fragmented histories -- natural, personal, cultural -- to find shadowy outlines of other stories of place in America. Every landscape is an accumulation, reads one epigraph. Life must be lived amidst that which was made before. Courageously and masterfully, Lauret Savoy does so in this beautiful book: she lives there, making sense of this land and its troubled past, reconciling what it means to inhabit terrains of memory and to be one. Though deeply personal, *Trace* concerns who we all are in this terrain called the United States, inviting readers to have a more honest understanding of history's impact in our lives.

**Language, Memory and Remembering-** VAIDEHI. RAMANATHAN 2020-12-18 This volume explores issues of memory, remembering and language in late colonial India. It is the first systematic historical sociolinguistic study of English private and public citizens who lived in and/or worked for India and the Indian cause from the 1920s to the 1940s. While some of the English have lived as common citizens and were committed to India, their voices and contributions have remained on the margins of Indian collective memory. This book offers microhistorical readings of extended language forms generally underexplored in sociolinguistics (such as letters, telegrams, missives, and oral histories) to reorient facets of individual memories, lives, and endeavours against larger officialised understandings of the past. Using previously unpublished corpus of archival material and interviews with English private citizens from that period, this volume on historical sociolinguistics will be of interest to scholars and researchers of language and linguistics, South Asian studies, post-colonial

literary studies, culture studies, and modern history.

**Strangers from a Different Shore**-Professor Department of Ethnic Studies Ronald Takaki 2012-11 In an extraordinary blend of narrative history, personal recollection, & oral testimony, the author presents a sweeping history of Asian Americans. He writes of the Chinese who laid tracks for the transcontinental railroad, of plantation laborers in the canefields of Hawaii, of "picture brides" marrying strangers in the hope of becoming part of the American dream. He tells stories of Japanese Americans behind the barbed wire of U.S. internment camps during World War II, Hmong refugees tragically unable to adjust to

Wisconsin's alien climate & culture, & Asian American students stigmatized by the stereotype of the "model minority." This is a powerful & moving work that will resonate for all Americans, who together make up a nation of immigrants from other shores.

**Civilizing Nature**-Bernhard Gissibl 2012-11-30 National parks are one of the most important and successful institutions in global environmentalism. Since their first designation in the United States in the 1860s and 1870s they have become a global phenomenon. The development of these ecological and political systems cannot be understood as a simple reaction to mounting environmental problems, nor can it be explained by the spread of environmental sensibilities. Shifting the focus from the usual emphasis on national parks in the United States, this volume adopts an historical and transnational perspective on the global geography of protected areas and its changes over time. It focuses especially on the actors,

networks, mechanisms, arenas, and institutions responsible for the global spread of the national park and the associated utilization and mobilization of asymmetrical relationships of power and knowledge, contributing to scholarly discussions of globalization and the emergence of global environmental institutions and governance.

### **The Rise of the Arabic Book**

Beatrice Gruendler 2020-10-13 The little-known story of the sophisticated and vibrant Arabic book culture that flourished during the Middle Ages. During the thirteenth century, Europe's largest library owned fewer than 2,000 volumes. Libraries in the Arab world at the time had exponentially larger collections. Five libraries in Baghdad alone held

between 200,000 and 1,000,000 books each, including multiple copies of standard works so that their many patrons could enjoy simultaneous access. How did the Arabic codex become so popular during the Middle Ages, even as the well-established form languished in Europe? Beatrice Gruendler's *The Rise of the Arabic Book* answers this question through in-depth stories of bookmakers and book collectors, stationers and librarians, scholars and poets of the ninth century. The history of the book has been written with an outsize focus on Europe. The role books played in shaping the great literary cultures of the world beyond the West has been less known—until now. An internationally renowned expert in classical Arabic literature, Gruendler corrects this oversight and takes us into the rich literary milieu of early Arabic letters.
