**Concepts of Biology**-Samantha Fowler 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

**Security Studies**-Theo Farrell 2009-11-24 Security Studies traces its origins to work on the causes of war. It remains the most significant subdiscipline of International Relations and, at the beginning of the twenty-first century, its concerns with the security of the international system and the individual, as well as the state, remain as pertinent and urgent as ever. Addressing the need for an authoritative reference work to make sense of this rapidly growing and ever more complex corpus of scholarly literature, Security Studies is a new title in the Routledge series, Critical Concepts in International Relations. Edited by Theo Farrell of King's College London and chair of the International Security Studies section of the International Studies Association, it is a five-volume collection of the foundational and the very best cutting-edge scholarship

**Terrorism and Literature**-Peter C. Herman 2018-09-13 Terrorism has long been a major shaping force in the world. However, the meanings of terrorism, as a word and as a set of actions, are intensely contested. This volume explores how literature has dealt with terrorism from the Renaissance to today, inviting the reader to make connections between older instances of terrorism and contemporary ones, and to see how the various literary

treatments of terrorism draw on each other. The essays demonstrate that the debates around terrorism only give the fictive imagination more room, and that fiction has a great deal to offer in terms of both understanding terrorism and our responses to it. Written by historians and literary critics, the essays provide essential knowledge to understand terrorism in its full complexity. As befitting a global problem, this book brings together a truly international group of scholars, with representatives from America, Scotland, Canada, New Zealand, Italy, Israel, and other countries.
