**Making a Living, Making a Life**-Sara James 2017-09-22 In a world in which individuals will undergo multiple career changes, is it possible any longer to conceive of a job as a meaningful vocation? Against the background of fragmentation and rationalisation of work, this book explores the significance and meaning of work in contemporary life, raising the question of whether people continue to feel motivated to dedicate their lives to their work, or must now look to other areas of life for meaning. Based on rich, in-depth interviews conducted with workers of different ages and across a broad range of occupations in the major city of Melbourne, Making a Living, Making a Life reveals that work continues to be a source of pride, passion and purpose, the author shedding light on the ways in which cultural narratives, collective meanings and structural factors influence people's feelings about work. An engaging and empirically grounded examination of the meaning and centrality of work to people's lives in today's 'liquid' modern world, this book will appeal to sociologists with interests in cultural sociology, social theory, ethics, the sociology of work and questions of identity.

**Scratch**-Manjula Martin 2017-01-03 A collection of essays from today's most acclaimed authors—from Cheryl Strayed to Roxane Gay to Jennifer Weiner, Alexander Chee, Nick Hornby, and Jonathan Franzen—on the realities of making a living in the writing world. In the literary world, the debate around writing and commerce often begs us to take sides: either writers should be paid for everything they do or writers should just pay their dues and count themselves lucky to be published. You should never quit your day job, but your ultimate goal should be to quit your day job. It's an endless, confusing, and often controversial conversation that, despite our bare-it-all culture, still remains taboo. In Scratch, Manjula Martin has gathered interviews and essays from established and rising authors to confront the age-old question: how do creative people make money? As contributors including Jonathan Franzen, Cheryl Strayed, Roxane Gay, Nick Hornby, Susan Orlean, Alexander Chee, Daniel Jose Older, Jennifer Weiner, and Yiyun Li candidly and emotionally discuss money, MFA programs, teaching fellowships, finally getting published, and what success really means to them, Scratch honestly addresses the tensions between writing and money, work and life, literature and commerce. The result is an entertaining and inspiring

book that helps readers and writers understand what it's really like to make art in a world that runs on money—and why it matters. Essential reading for aspiring and experienced writers, and for anyone interested in the future of literature, Scratch is the perfect bookshelf companion to On Writing, Never Can Say Goodbye, and MFA vs. NYC.

**Teaching with Poverty in Mind**-Eric Jensen 2010-06-16 In Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, Teaching with Poverty in Mind reveals \* What poverty is and how it affects students in school; \* What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain); \* Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and \* How to engage the resources necessary to make change happen. Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.

**The In-Between**-Jeff Goins 2013-07-23 We're an "instant gratification" generation—but most change happens gradually. Many of us spend our lives searching and longing for something more than what is in front of us. Whether it's traveling abroad or chasing cheap (or expensive) thrills, we're all looking for the medicine to satisfy our restlessness. And so often we're looking in the wrong place. The In-Between is a call to accept the importance that waiting plays in our lives. Can we embrace the extraordinary nature of the ordinary and enjoy the daily mundane—what lies in between the "major" moments? Learning to live in this tension, to be content in these moments of waiting, may be our greatest struggle—and our greatest opportunity to grow.

**Making a Living, Making a Difference**-Maria Agren 2016-12-01 What do people do all day? What did women and men do to make a living in early modern Europe, and what did their work mean? As this book shows, the meanings depended both on the worker and on the context. With an innovative analytic method that is yoked to a specially-built database of source materials, this book revises many received opinions about the history of gender and work in Europe. The applied verb-oriented method finds the 'work verbs' that appear incidentally in a wide variety of early modern sources and then analyzes the context in which they appear. By tying information technologies and computer-assisted analysis to the analytic powers - both quantitative and qualitative - of

professional historians, the method gets much closer to a participatory observation of the micro-patterns of early modern life than was once believed possible. It directly addresses a number of broad problems often debated by historians of gender and early modern Europe. First, it discusses the problem of assessing more accurately the incidence, character and division of work. Second, it analyzes the configurations of work and human difference. Third, it deals with the extent to which work practices created notions of difference - gender difference but also other forms of difference - and, conversely, to what extent work practices contributed to notions of sameness and gender convergence. Finally, it studies the impact of processes of change. Drawing on sources from Sweden, the authors show the importance of multiple employment, the openness of early modern households, the significance of marriage and marital status, the gendered nature of specific tasks, and the ways in which state formation and commercialization were entangled in people's everyday lives.

**Goodbye, Things: The New Japanese Minimalism**-Fumio Sasaki 2017-04-11 The best-selling phenomenon from Japan that shows us a minimalist life is a happy life. **The Life You Can Save**-Peter Singer 2009-03-03 For the first time in history, eradicating world poverty is within our reach. In *The Life You Can Save*, Peter Singer uses ethical arguments, illuminating examples, and case studies of charitable giving to show that our current response to world poverty is not only insufficient but morally indefensible. *The Life You Can Save* teaches us to be a part of the solution, helping others as we help ourselves.

**The Gentle Art of Swedish Death Cleaning**-Margareta Magnusson 2018-01-02 A charming, practical, and un sentimental approach to putting a home in order while reflecting on the tiny joys that make up a long life. In Sweden there is a kind of decluttering called *döstädning*, *dö* meaning "death" and *städning* meaning "cleaning." This surprising and invigorating process of clearing out unnecessary belongings can be undertaken at any age or life stage but should be done sooner than later, before others have to do it for you. In *The Gentle Art of Swedish Death Cleaning*, artist Margareta Magnusson, with Scandinavian humor and wisdom, instructs readers to embrace minimalism. Her radical and joyous method for putting things in order helps families broach sensitive conversations, and makes the process uplifting rather than overwhelming. Margareta suggests which possessions you can easily get rid of (unworn clothes, unwanted presents, more plates than you'd ever use) and which you might want to keep (photographs, love letters, a few of your children's art projects). Digging into her late husband's tool shed, and her own secret drawer of vices, Margareta introduces an element of fun to a potentially daunting task. Along the way readers get a glimpse into her life in Sweden, and also become more comfortable with the idea of letting go.

How to solve this problem? *Hamlet's BlackBerry* argues that we just need a new way of thinking, an everyday philosophy for life with screens. William Powers sets out to solve what he calls the conundrum of connectedness. Reaching into the past—using his own life as laboratory and object lesson—he draws on some of history's most brilliant thinkers, from Plato to Shakespeare to Thoreau, to demonstrate that digital connectedness serves us best when it's balanced by its opposite, disconnectedness. Lively, original, and entertaining, *Hamlet's BlackBerry* will challenge you to rethink your digital life.
